RE: Salt River Project - Santan Expansion Project

Dear Mr. Sundlof:

I hope this response reaches you in a timely manner. I have injured my ankle and am somewhat slower in meeting my obligations. You have asked me for an update on what I had sent you previous to the September hearing. I offer you the following.

- At the hearing, I was only able to stay until about 11AM. I therefore delivered my speech to the hearing stenographer and was informed that she would put it into the transcript. Whether or not that happened remains to be seen since none of us have received a copy of the transcript. Have you?
- I have asked for the longest time for a copy of the market studies that SRP has ordered from independent companies regarding our concern for our property values. It was because of this that I was not really able to deliver any factual support for some of my concerns. Saretta Parrault, another intervener, has just informed me that someone has sent them to her. I will read them as soon as I am able.
- I will continue to focus on property values as my main concern. I will prepare something in time for the 10/25 hearing.
- If my speech was not entered into the transcript, I will amend it before the 10/25 hearing and take out anything that has already been touched on by other COST members or interveners to the best of my ability and only touch on what concerns may not have been delivered. Again, do you know how I can get the transcript so that I can be more prepared?

I will be at the October 11<sup>th</sup> procedural conference, which by the way I object to strongly. You can talk to me then if you have any update for me. Thanks for your help.

Sincerely,

Catherine M. LaTona
